

# Bearing flange for encoders with synchro flange

## (Z 119.035)

Article number: 10158124

### Overview

- For all encoder with synchro flange and 6 mm shaft
- Material: Aluminium, bare

### Technical data

#### Technical data

Operating speed	≤10000 rpm
Admitted shaft load	≤200 N axial ≤250 N radial

#### Technical data

Spring disk coupling	Radial offset: ±0.3 mm Angular shift: ±2.5° Axial offset: ±0.4 mm
Weight approx.	360 g
Material	Aluminium, bare

### Description

The bearing flange can be mounted at any encoder with synchro flange and 6 mm shaft. It considerably improves the encoder shaft load. Spring washer coupling and mounting screws are included in the delivery.

### Dimensions
