- Disconnect power before connecting the sensor.
- Voltage supply according UL 1310, Class 2
or device shall be protected by an external R/C or listed fuse, rated max. 30 VAC/3A or 24 VDC/4A

Mounting Instructions

It is recommended that the object to be detected approaches the active area of the sensor from the side. This may avoid malfunctions caused by deflection of the light beam at edges. Exception: Sensors with line beam

qTarget®
The Baumer design aligns the sensor's light beam to the fixing holes (qTarget®). This allows a fast and easy installation without fine-tuning as well as fast exchange.
